

**Assignment I, FYSE 130**  
**Fall 2014**  
**Due 8/22/14 at start of class**

Please write complete answers to the following (on separate paper). As long as your writing is legible, you do not need to type your answers – though typeset answers are always appreciated. Please spend some time with this – you won't have many homework assignments like this throughout the semester, so – even though the questions on this sheet are fairly basic – this will have a non-negligible impact on your final course grade. Don't forget to solve number 11 (on the back of this sheet).

1. What is your full name?
2. What is your expected major?
3. Name any/all math classes you have completed above “algebra”. (Include courses completed at the high school or collegiate level. Please give me course names, not course numbers).
4. Name any/all science classes you have completed in high school or college. (Again, please give me course names – not course numbers. Indicate courses you've completed in college with an asterisk).
5. What are your goals for this course?
6. What are your expectations for me from this course?
7. How would you define sport? (Don't look something up here – I want your definition).
8. Do you play on any of the college sports teams? (If so, which?)
9. Do you play any sports at least 6 times/year? (If so, which?)
10. What are your 10 favorite sports (in order)?

More on back!

11. Would you characterize the following as sports? (Yes or no for each is sufficient – you do not have to give me your rationale – though it should be consistent with the definition you gave above! If your answer needs to be qualified, by all means give your answer with a brief qualification.)
- a) Baseball?
  - b) Auto Racing?
  - c) Bowling?
  - d) Poker?
  - e) Chess?
  - f) Pilates?
  - g) Figure Skating?
